

DAS-PVP Portable Vacuum Pump

Rugged, reliable, cost effective portable vacuum generation

The DAS-PVP provides a go anywhere, reliable vacuum supply for the DAS300 range of Drill alignment systems. The DAS-PVP uses an eccentric diaphragm pump which is maintenance and oil free and is vitally leak tight.

The DAS-PVP will run continuously for 10 hours from a single charge of its internal lead acid gel battery. The DAS-PVP is extremely efficient and is therefore much less expensive to run and considerably quieter than compressed air vacuum generators.

The DAS-PVP has an inbuilt state of charge indicator and is housed in a rugged, water proof ATA 300 approved case.

The DAS-PVP uses an industry standard 6mm push fitting for vacuum connection to the DAS300 series equipment.

As standard the DAS-PVP is supplied with a mains powered charger 100V - 240V, 50Hz - 60Hz and 3.5 meters of vacuum connecting pipe.

Dimensions	24.1 x 19 x 10.8cm 9.5" x 7.5" x 4.25"
Maximum Vacuum	-900mbar -26.5 inHg
Maximum Flow Rate	8L per min
Vacuum Connection	6mm Push Fit
Weight	4kg
Standard Battery Other types on request	12V 10A/hr Lead acid gel
Endurance	10 hrs continuous
Standard Recharge Time	10 hrs
